BASIC FLOOR PADS

BLACK-STRIP

Black Strip is an aggressive pad for the thorough cleaning of any kind of hard surfaces. Ideal for complete floor finish removal. Recommended for use with professional wet cleaning chemicals and the stripping machines at 150-350 rpm

BLACK PREMIUM PADS

High quality black pads.
Increased aggressiveness and endurance.

BROWN-STRIP

Less aggressive than black pad, designed for the finishing of the thorough cleaning and stripping jobs on any kind of hard surfaces covered with protecting finish. It is recommended for use with professional wet cleaning chemicals and the stripping machines at 150-350 rpm.

BROWN PREMIUM PADS

High quality brown pads.
Increased aggressiveness and endurance.

GREEN-SCRUB

Medium abrasiveness pad for daily maintenance wet cleaning jobs on all types of hard surfaces. It perfectly removes all ongoing build up and the top polymer coat layer for its renovation. Recommended for use with scrubber – driers at 150-350 rpm.

BLUE-CLEANER

Medium aggressive pad for everyday wet and spray cleaning methods. Works well as replacement for green pad or whenever more gentle floor treatment is required. It efficiently removes damaged top polymer coat layer for the floor renovation. Recommended for use with scrubber – driers at 150-350 rpm.

MAROON / Reconditioning and Chemical Free Stripping Pad

Specialised pad for a quick renovation of the wooden floor protected with an oil or varnish. It is widely used for plane levelling and matting of the top layer before the application of the very last layer of varnish. Pad is recommended for use with the scrubbing machines at 150 – 350 rpm, with neither water nor chemicals use.

MAROON pad can be used as in replacement of the sanding mesh 180 grit

BASIC FLOOR PADS

RED LIGHT CLEAN

Pad for gentle washing, everyday maintenance and spray cleaning of all types of hard floors, both protected and not protected by floor finish. Red pad is ideal for gentle cleaning of wooden and synthetic surfaces like tarkett flooring. Recommended for use with scrubber – driers at 150-350 rpm.

TURF PAD/RUFF/BRUSH PAD

Brush pad designed for intensive scrubbing, especially of the porous and nonslippery flooring. It is three times more robust than the green pad. It is exceptionally efficient for deep grouts, giving a better quality cleaning effect than a hand brush can provide. Recommended for use with scrubber – driers at 150-350 rpm.

SPEED TREK/TIGER/CARPET BONNET

Two-sided bonnet pad is made of synthetic looped fibres and brush stripes (similar to Ruff pad) which increase the cleaning efficiency. Ideal choice for gentle cleaning of fitted carpets, wood floors and all types of synthetic surfaces and tiles. This pad is very durable and wear-resistant. Recommended for use with scrubber – driers at 150-350 rpm.

WHITE-POLISH

Ideal choice for polishing of ceramic tiles, linoleum, PVC and all synthetic surfaces, both protected and not protected with polymer finish. To be used with any polishing machines at up to 1500 rpm.

Type 37 - Natural Hair Blend Heavy

GORILLA / Minimal Burnishing-Harder Finishes

Gorilla Pad structure is based on mostly natural fibre mixed with some addition of synthetic one and is perfectly suitable for the polishing of stone, tiles and surfaces with solid and thick protective coat. It leaves the floor looking wet. It is recommended for use with any high-speed polishing machine at up to 3000 rpm.

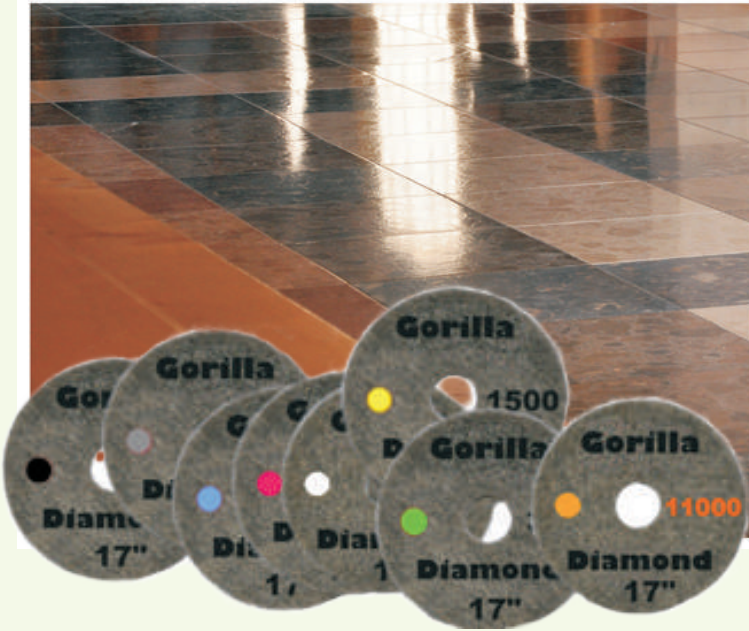

DIAMOND PADS

Gorilla Diamond

MAINTENANCE SYSTEM

GRANIT
MARBLE
CONCRETE
TERRAZZO
TILES

Gorilla Diamond is revolutionary system of cleaning, polishing and refurbishing of the flooring thanks to the structure of the pad, made of unique mixture of natural and synthetic fibre, containing billions of microscopic industrial diamonds particles.

Gorilla Diamond is a perfect tool at cleaning of the damaged and matt (worn) flooring without usage of any chemicals, up to the highest shine overwhelming effect.

Diamond Pads – all features

- Good at everyday maintenance
- Suitable for all types of the scrubber-drier machines
- GRIT grades 50, 100, 200, 400, 800, 1500, 3000, 11000
- Stock sizes available from 12" to 27"
- Chemicals are not needed for the cleaning process, only clean water

 **GORILLA DIAMOND 50 BLACK**

 **GORILLA DIAMOND 100 GRAY**

 **GORILLA DIAMOND 200 BLUE**

- grinding capability on very strongly damaged floors
- very abrasive
- removes scratches and blemishes
- abrasive GRIT grades (50,100,200) for the convenient choice, appropriate to the degree of the floor damages

 **GORILLA DIAMOND 400 RED**

- very abrasive
- for heavy duty tasks
- suitable for polishing straight after grinding
- removes scratches and discoloration
- ideal for surfaces matting

 **GORILLA DIAMOND 800 WHITE**

- medium GRIT grade
- removes the dirt
- good choice for finishing tasks
- helps to keep the floor slightly shining

 **GORILLA DIAMOND 1500 YELLOW**

- removes small scratches
- prepares the floor surface for burnishing
- helps to keep the floor slightly shining

 **GORILLA DIAMOND 3000 GREEN**

- super finish pad
- final burnishing jobs
- daily maintenance
- produces a "wet look" shine

 **GORILLA DIAMOND 11000 ORANGE**

- daily maintenance
- increases the shining
- produces a highest "wet look" shine

RENOVATION OF STONE FLOORS

DIAMOND HYBRID PADS

Diamond hybrid pads are the perfect choice for professionals who use scrubbing and polishing machines (150-800 rpm) for stone surfaces renovation.

Diamond hybrid pad is in fact a regular Gorilla pad with diamond grinding segments attached to it. The shape and the quantity of segments both depend on the diameter of the given pad.. Should your pad produce high shining floor for you, it needs to be of GRIT grade from 50 to 3000.

Diamond hybrid pads offer far longer service life and productivity compared to conventional diamond pads.

Grinding and polishing segments are indeed a professional tools, used for years only by most advanced professionals equipped with specialized machinery whenever stone floors were to refurbish. With these hybrid diamond pads you can from now on use standard machines dedicated to floor cleaning and burnishing.

There is no need to use special grips with slots into segments.

Hybrid pads are recommended especially for heavy jobs of grinding and renovation of intensively worn and damaged floors.

For example, industrial concrete floors grinding results in extended and rapid wear of regular diamond pads. Hybrid pads used instead significantly improve the productivity, quality and cost efficiency. In our offer, hybrid pads are sized from 12" to 27" of diameter and are available at various GRITgrades.

MELAMINE PADS / SCRUB / CLEAN PADS

MACHINE PADS

Properties:

1. Perfect choice when cleaning of micro-porous surfaces like tiles and terracotta. Also suitable for terrazzo, marble, concrete, granite, PVC and linoleum.
2. Triple layer structure guarantees yet better resilience of the pad.
3. High quality melamine foam generates great power of absorption of water and dirt.
4. Remarkable saving on chemicals – pads are to be used either with just clean water or with heavily diluted chemicals solutions for gentle cleaning.
5. Reduction of the overall cleaning expenditures.
6. Product is fully eco-friendly and biodegradable.

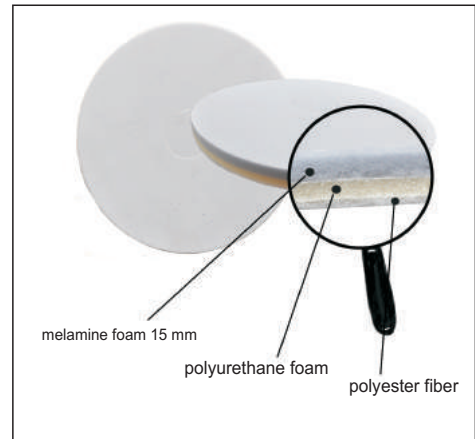

Caution:

Melamine foam layer of the pad must be thoroughly dampen before the use!

HAND PADS

The unique structure of melamine foam layer of our handheld pads guarantees a perfect removal of: dirt, stains, fingerprints, traces of crayons, pens, felt-tips, shoe prints **ONLY with water without any chemicals added.**

Hand pads are ideal for cleaning of tiles in a bathroom, of grouts, of ceramic and stone tiles, doors, walls, computer equipment and of office furniture.

They do perfect job at the car interior cleaning of cockpits, headlining and the leather or fabric upholstery.

How to use:

With damp pad rub the dirty surface until dirt/stains/prints are completely removed.
Along with the water, heavy duty tasks may require the use of chemicals appropriate to the nature of the dirt.
